

How Did Pfizer’s COVID-19 Vaccine Reflect a Deeper Global Agenda of Deception?

Sixbert SANGWA • November 16, 2024

The revelations about Pfizer's COVID-19 vaccine, meticulously documented in Dr. Naomi Wolf's ["The Pfizer Papers: Pfizer's crimes against humanity,"](#) present a disturbing narrative of corporate misconduct, public health manipulation, and potential involvement in a broader agenda of global control. Drawing from Pfizer's own clinical trial data and internal documents, Wolf and her team of over 3,000 volunteers expose a pattern of deliberate concealment of adverse events, manipulation of trial protocols, and disregard for potential long-term health impacts.

The scope of deception revealed in Wolf's analysis is profound, encompassing issues from reproductive health risks to the integrity of scientific processes. As she notes, *"Pfizer knew about the deaths, the miscarriages, the neurological injuries, the cardiac injuries... and kept right on 'vaccinating.'"* Wolf's investigation uncovered that Pfizer was aware of over 1,000 deaths and tens of thousands of adverse events within the first three months of the vaccine rollout, yet continued to promote its safety and efficacy (Wolf & Kelly, 2024). These findings align with a shocking year-long study by Canadian scientists, which estimates that about 17 million people worldwide have died from the mRNA COVID-19 vaccines - a figure that dwarfs the 7 million global deaths attributed to COVID-19 itself, of which 1.2 million occurred in the U.S.(Walsh, 2024).

Sinister Findings from Pfizer's Documents

- **Deliberate Cover-Up of Adverse Events:** Pfizer's internal data, uncovered through legal battles, revealed that the company was fully aware of severe adverse events during clinical trials. These included cardiovascular complications, neurological disorders, and even deaths among participants. Despite this, Pfizer allegedly downplayed these risks, portraying the vaccine as safe and effective. One must ask: How could such critical information be concealed from regulators, governments, and the public without a larger agenda at work? Naomi Wolf's research suggests that this concealment amounted to a crime against humanity (Wolf & Kelly, 2024). This aligns with the perspective discussed in a legal analysis by Cliffe Dekker Hofmeyr (2022), which examines the potential classification of COVID-19 vaccine-related actions as crimes against humanity (Cliffe Dekker Hofmeyr, 2022). Additionally, similar concerns have been raised by other researchers, such as Dr. Peter McCullough et al. (2022) in their paper *"Curing the pandemic of misinformation on COVID-19 mRNA vaccines through real evidence-based medicine"* (McCullough et al., 2022).

- **Reproductive and Fertility Harms:** Another deeply concerning aspect of the documents is their revelation of severe impacts on fertility and pregnancy outcomes. Wolf and her team found alarming evidence suggesting vaccinated individuals experienced increased rates of miscarriages, menstrual irregularities, and other reproductive health issues. According to Wolf's book, in one section of the documents, over 80% of the pregnancies followed resulted in miscarriage or spontaneous abortion. In another section, two newborn babies died, with Pfizer describing the cause of death as "maternal exposure" to the vaccine.

Some researchers have linked these effects to the vaccine's lipid nanoparticles, which have been shown to accumulate in the ovaries (Wolf & Kelly, 2024). These findings align with concerns raised by other researchers and legal analysts. For instance, a legal analysis by Cliffe Dekker Hofmeyr (2022) examines the potential classification of COVID-19 vaccine-related actions as crimes against humanity (Cliffe Dekker Hofmeyr, 2022). Additionally, similar concerns have been raised by other researchers, such as Dr. Peter McCullough et al. (2022) in their paper *"Curing the pandemic of misinformation on COVID-19 mRNA vaccines through real evidence-based medicine"* (McCullough et al., 2022). These parallel findings and the shocking statistics from Pfizer's own documents raise serious questions about how such potentially devastating risks could be overlooked or potentially concealed in a society claiming to prioritize health and life, especially that of mothers and infants.

- **Unethical and Manipulative Trial Practices:** Pfizer's clinical trials reportedly involved unethical practices, such as unblinding participants prematurely and manipulating data to produce more favorable results. Such actions not only violated the integrity of scientific research but also posed significant dangers to public health (Wolf & Kelly, 2024). If trial results were falsified or manipulated, can we trust any of the data presented by Pfizer and other pharmaceutical companies? This echoes the biblical warning about those who *"suppress the truth by their wickedness"* (Romans 1:18).

- **Lipid Nanoparticle Concerns:** The vaccine's reliance on lipid nanoparticles (LNPs) has sparked significant debate. These particles, designed to deliver mRNA into cells, were found to accumulate in organs such as the liver, spleen, and ovaries. Long-term studies on these accumulations are lacking, but early research suggests they could lead to chronic health issues (Wolf & Kelly, 2024). How could such a potentially dangerous technology be deployed on a global scale without proper safety evaluations? Could this represent a step toward greater physical control over the human body, as some theorists have suggested?

- **Conflicts of Interest and Suppression of Truth:** Pfizer's cozy relationships with regulatory agencies, media outlets, and influential figures reveal an interconnected web of influence. Wolf points out that these relationships enabled the suppression of negative information while amplifying pro-vaccine narratives. For example, dissenting voices in the scientific community were silenced or labeled as conspiracy theorists (Wolf & Kelly, 2024). Is this not reminiscent of the oppressive systems foretold in Scripture, where truth becomes suppressed by the ruling powers (Amos 5:10-13)?

Further alarming revelations from Pfizer's documents paint a grim picture of the vaccine's impact. Within 48 hours of administration, vaccine components were found to disperse throughout the body, accumulating in various organs and raising concerns about potential long-term damage. Disturbingly, infants breastfed by vaccinated mothers reportedly suffered severe illnesses and even deaths, highlighting unforeseen risks to the most vulnerable. The vaccine was also associated with increased autoimmune disorders and aggressive cancer growth, adding to the list of serious health concerns. Perhaps most shocking is the revelation that Pfizer was aware by April 2021 that the injections were damaging the hearts of young individuals, yet continued to promote the vaccine's safety. Additionally, allegations surfaced that Pfizer concealed eight vaccinated deaths during clinical trials to present more favorable results, raising serious questions about the integrity of the trial process and the extent of information withheld from the public.

Connecting the Dots: The New World Order Agenda

The implications of Pfizer's actions extend far beyond public health. Theories about the vaccine rollout being part of a broader *"New World Order"* agenda have gained traction, especially among Christian thinkers and alternative researchers. These theories often link to events like the World Economic Forum's *"Great Reset"* initiative as evidence of a coordinated plan to reshape global societies (Schwab & Malleret, 2020).

- **The Great Reset and Centralized Power:** Klaus Schwab's "Great Reset" initiative, promoted by the World Economic Forum (WEF), calls for a restructuring of global governance, economies, and societies in the aftermath of COVID-19. Central to this vision is the use of technology for surveillance, digital IDs, and social credit systems. These developments eerily align with biblical prophecies about an end-times system of control, where "no one can buy or sell unless he has the mark" (Revelation 13:17).

- **Population Control and Eugenics Agendas:** The impacts of the vaccine on fertility raise uncomfortable questions about whether population control could be a covert objective. Dr. Joseph Mercola and Robert F. Kennedy Jr. suggested that the pandemic and vaccine rollout were part of a planned effort to establish greater global control. Similarly, Robert F. Kennedy Jr.'s book *"The Real Anthony Fauci"* argues that the pandemic response was influenced by a *"Pharma-Fauci-Gates alliance"* seeking to advance a globalist agenda (Kennedy, 2021). Both Joseph and Kennedy have argued that the pandemic response reflects a calculated strategy to implement eugenicist policies and consolidate power among elite groups.

- **Digital Compliance Systems:** The push for vaccine passports and digital health IDs represents a significant step toward global surveillance systems. These tools, initially justified for public health, could evolve into mechanisms for controlling access to services, employment, and basic rights. Are these systems laying the groundwork for the Antichrist's reign, as described in Revelation?

Concluding Thoughts

The Pfizer revelations challenge us to remain vigilant and rooted in God's Word. Jesus warned that in the last days, many would be deceived (Matthew 24:24). This deception is not only spiritual but often manifests through worldly systems designed to lead people away from the truth. As we grapple with these revelations, we must ask ourselves: Why was there such a coordinated effort to suppress dissenting voices about vaccine safety, even when legitimate concerns were raised by credible experts?

As we navigate these turbulent times, let us hold fast to the hope we have in Christ, who is sovereign over all earthly powers (Colossians 1:16-17). Let us also advocate for justice, truth, and transparency, recognizing that exposing darkness is part of our calling as children of light (Ephesians 5:11). However, we must also exercise discernment. How do we, as Christians, discern the difference between conspiracy theories and the unveiling of dark spiritual realities at work in the world (Ephesians 6:12)?

Above all, we must pray for wisdom and courage to stand firm in faith, trusting that *"the plans of the Lord stand firm forever"* (Psalm 33:11), even as the schemes of man crumble around us. As we witness the rapid rollout of potentially harmful technologies, coupled with a push for centralized control, we must prayerfully consider: Could these developments signify the approach of prophetic events described in Scripture?
